

## DTH BIT

### CONCAVE

- Suitable for drilling in all formations.
- Cone shaped depression in the face has centering effect for straighter holes.
- Well suited for soft to medium formations.

### FLAT

- Face slots help eliminates bit plugging in softer zones.
- More carbide to surface contact for better rock fractures.
- Well suited for medium to hard formations.

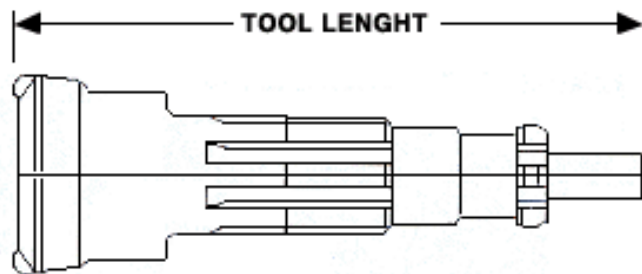

### CONVEX

- Fast penetration rates.
- Face design allows for increased body support for gage carbide.
- Well suited for hard and abrasive formations

## DTH BIT

**Simple design & excellent hardness, strictly controlled quality.  
They lead your work to the best result!!**
