## DTH Hammer & Bits

Our Hammers are suited for any type of drilling environment including water well, quarry, open pit and underground mining, construction drilling, blast hole work, environmental, and oil and gas.

.....

The company's D.T.H. Percussive Drilling Equipment is used for a wide range of rock drilling including :

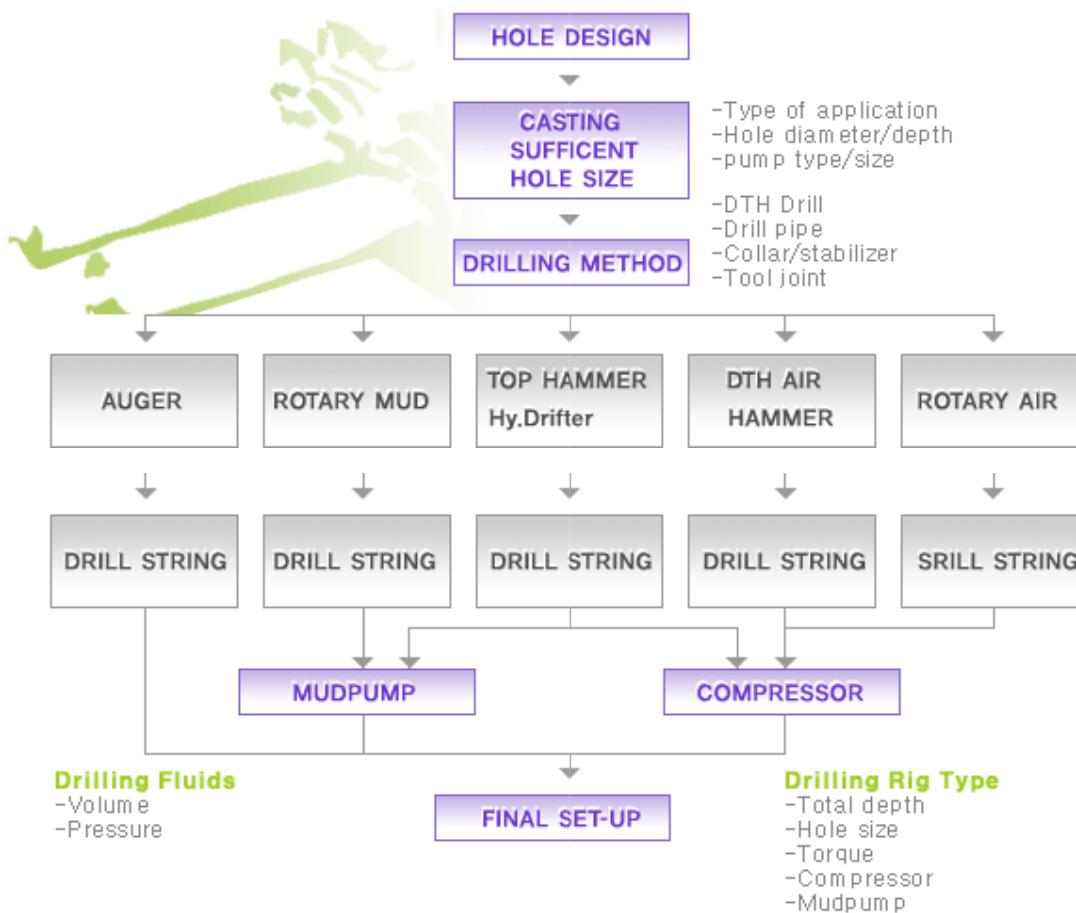

**Water Well Drilling**  
**Mining & Quarrying**  
**Seismic Shot Hole Drilling**  
**Mineral Exploration**  
**Civil Construction:**

- ▶ Bored Piles
- ▶ Mini Piling
- ▶ Rock Anchoring
- ▶ Slope Stabilization Grouting

We are committed to a policy of ongoing investment in product development, aimed at both improving the existing range and introducing new products to increase and extend the applications for Down Hole Percussive Drilling.

## CHART

The way to choose suitable drilling equipment is complicated and a lot of information is required to reach performance and economy in the operation. Aspects that have to be taken into consideration are the purpose of the bore hole, geology, hydrogeology pump, method of drilling, flushing media and so on. The sketch above is to illustrate the borehole and the diagram gives guidance in the process of finding a good set-up for the intended work.
